PROFESSIONAL SUMMARY

Product Manager in B2B SaaS with two years owning prioritization, requirements, and release readiness. Founder of a community platform now in live beta, and a former ten-year classroom teacher. Informed by product analytics and SQL, builds with AI daily, and reads and reviews code.

CORE SKILLS

- **Product Management:** Roadmap & Prioritization, Requirements & User Stories, Agile / Scrum, Zero-to-One Build, QA & Release Readiness
- **AI-Native Building:** Claude & Claude Code — custom PM automation toolkit, interactive HTML prototyping, multi-persona advisory simulation
- **Technical Fluency:** Codebase Review, Next.js, SQL (AI-assisted), Azure DevOps (Boards, Backlogs, QA)
- **Product Analytics:** Working use of Google Analytics, Microsoft Clarity, Azure Application Insights
- **Domain:** B2B SaaS, EdTech (Canvas LMS), Community Platforms

PROFESSIONAL EXPERIENCE

Associate Product Manager (formerly Product Analyst)

Price Studio – Revenue Management Solutions (B2B SaaS, AI-powered, 150,000+ restaurant locations) | Oct 2024 – Present

- Own prioritization decisions each sprint cycle, weighing business priorities, cost, and expected return — and clearly articulating the tradeoffs behind every call to engineering and stakeholders.
- Write clear requirements and user stories in recurring planning and refinement sessions, working directly with engineering on technical constraints and tradeoffs.
- Implemented and standardized sprint planning and engineering management processes, improving delivery clarity and cadence across the team.
- Own QA coordination and release readiness, validating features against acceptance criteria prior to every production release.
- Built and use daily an AI-powered PM automation toolkit (Claude) that turns unstructured stakeholder input into clean tickets and interactive HTML mockups for engineering review.
- Review product and performance data — Google Analytics, Microsoft Clarity, Azure Application Insights — and use SQL for ad hoc questions to inform prioritization decisions.

Owner & CEO

Legacy Link HQ, LLC | 2026 – Present

- Founded Legacy Link, a private community platform keeping players and alumni connected to their athletic programs, and directed its build in Claude Code on a Next.js and SQL stack — from zero to a live beta, now piloting at no cost with USF Football (alma mater), owning product vision, iterative delivery, and success metrics end to end.
- Designed a custom AI “virtual board of directors” — nine executive personas built as a Claude skill — to stress-test product and business decisions through structured debate before committing resources.

Webmaster & Sales Support

The Connectivity Firm, Inc. | 2018 – Present

- Designed, launched, and maintain the company website; create marketing emails and manage LinkedIn presence.
- Building a quotes-tracking CRM that ingests company email to automatically log quotes and track them across pricing and projects — converting a manual sales workflow into structured pipeline data.
- Support outside sales for a low-voltage systems provider working with subcontractors and property owners — client calls, job sites, correspondence.

Math Teacher

Hillsborough County Public Schools (one of the nation’s largest districts) | 2014 – 2024

- Taught math for a decade in a high-accountability public school system, using student performance data to drive continuous instructional improvement.
- Worked daily in the Canvas LMS for five years, gaining firsthand insight into how learners and educators adopt, or abandon, software.

EDUCATION

B.S. in Business Administration — University of South Florida | 2007 – 2011 • Focus: Information Management Systems & Management

LEADERSHIP & ADDITIONAL EXPERIENCE

- **Football:** HS Coach, Plant High School (2012 – 2019), led Special Teams & mentored student-athletes • College athlete, three-year letterman & Special Teams MVP (2009), University of South Florida (2007 – 2011)
